ADBA OVERALL TOP 9 DOGS FINALIST SHEET

IMPORTANT: *Group placement points are no longer considered on Top 9 Finalist Sheet. List each dog's individual performance (mill distance/wall height/lure time) below. Place each competition 1st - 9th, then add up those three NEW point values on each dog to determine their final score/overall placement. If you encounter a tie when placing dogs on the mill, stop and move to wall climb individual results. If there is a tie on wall climb, divide dog's last height on the wall by the dog's height. If there is still a tie, use number of attempts. If the number of attempts is the same then move to lure/drag results. Place 1 - 9. Then you can determine the dog that scored higher in 2/3 of events. In these final steps, ALWAYS refer back to Tiebreakers for Overall Top Dog Event; use process of elimination - tiebreaker 1, tiebreaker 2, tiebreaker 3. (Dogs are no longer in groups and cannot have a runoff/climb off to break a tie.)*

ADD UP NEW placement point total for each competition to find overall point value, then place 1st - 9th

Placement Point Totals - Place each competition (Mill/Wall/Lure-Drag) 1st - 9th using the point values above.

Add each placement value (above) from each dog's individual results to determine the NEW overall TOTAL POINTS for the Overall Top 9 Placements.

(Do not transfer any placement scores from the Group Finalist Sheet. Only dog's individual results are taken into consideration on this page.)
