# ADBA OVERALL TOP 9 DOGS FINALIST SHEET

**Placement Point Totals - Place each competition (Mill/Wall/Lure-Drag) 1st - 9th using the point values below.**  
**Add each placement value (above) from each dog's individual results to determine the NEW overall TOTAL POINTS for the Overall Top 9 Placements.**  
**(Do not transfer any placement scores from the Group Finalist Sheet. Only dog's individual results are taken into consideration on this page.)**

**1st - 25 pts / 2nd - 20 pts / 3rd - 15 pts / 4th - 12 pts / 5th - 10 pts / 6th - 8 pts / 7th - 7 pts / 8th - 6 pts / 9th - 5 pts**

*Add Treadmill + Wall + Lure/Drag = Total Points*

Dog's Height	REGISTERED NAME	REG. #	TREADMILL Distance	Place Points	WALL Height - # Attempts	Height Calculation Wall height ÷ dog height	Place Points	LURE/DRAG Time	Place Points	TOTAL Points	PLACE

**\*IMPORTANT\***: Bring over top 9 dogs from group finalist sheet. Next, place each competition 1st - 9th. Add up those three point values on each dog to determine their total points. If you encounter a tie when placing dogs on the mill, the higher placement will go to the shorter dog. If the dogs are the same height STOP, then move to wall climb individual results. If there is a tie on the wall climb, divide dog's last height on the wall by the dog's height. If there is still a tie, use number of attempts. If the number of attempts is the same, STOP and move to lure/drag results. If you encounter a tie on the lure/drag the placement will go to the shorter dog. At this stage, each separate event should be scored 1 - 9. Add the three totals together to determine each dog's total points, then determine the overall placements. If there is tie once you have added up the three scores of all 9 dogs from each event, the tie would go to the shorter dog. If a tie remains, both dogs will receive the same placement points. (Example: 1, 2, 3, 4, 4, 5, 6, 7, 8 - still 9 placements, total)
